

**CODE:RA0001**

## PRODUCT

### Breathing Circuit

**STERILE**

## MATERIAL

Polyethylene (PE)

## MODEL

Corrugated

## SPECIALIZATION

Adult, pediatric & neonatal

## SPECS

- § Low airflow resistance directly bonded connectors to the tube for avoiding leakage risks.
- § Bio-compatible and Phthalates free material reduces allergy risk in patients.
- § Standard 22mm/15mm/10mm connection meet ISO-5356-1.
- § Sterilized by ethylene oxide, and the residual amount of ethylene oxide =  $<10\mu\text{g/g}$ .

## APPLICATION

For ventilator & anesthesia machines

## CONTRAINDICATION

No contraindications.

## PRECAUTION

- § Single use only, it is strictly forbidden to use it if the package is damaged and discard it after use.
- § The production batch is on the seal or packaging label, and the sterilization date is shown on the outer box.
- § This product is sterilized by ethylene oxide.

## INSTRUCTION

1. Select the applicable model and confirm that the outer packaging is intact before use.
2. Connect the circuit to anesthesia machine.
3. After use, discard it as medical waste to avoid pollution.

## STORAGE

- § This product should be loaded and transported in covered carriages and cabins. Keep it clean, avoid heavy pressure, direct sunlight and water.
- § This product should be stored in non-corrosive gas, well ventilated and clean environment. Keep away from fire sources. Relative humidity no exceeded at 80%.
